

Analysis of Electric Vehicle Charging Stations in German

Md Hasan

Introduction: Overview of the project and its goals

Problem Statement: Analyzing the availability and usage patterns of electric vehicle charging stations in Germany

- What are the usage patterns of electric vehicle charging stations in Germany?
- How does the number of charging points and power capacity vary across different types of charging stations?
- Which areas in Germany have the highest concentration of charging stations, and which areas have limited coverage?
- Are there specific types of charging stations that are more prevalent in certain regions or urban areas?
